This report is built from the games you actually played in this event — every round, every opponent, every point the rating moved. Nothing in it is a guess at what you might do; it is a reading of what you did.

One rating for every board you ever sit at

School hall, club night, district, state, open, FIDE-rated — the National Chess Rating counts them all. Claim your free NCR ID and every tournament you have played is found and added to it.

Prepared automatically by 8by8verse for every player in this tournament, at no cost. Tournament data, with thanks, from open sources.

ONE

What this tournament did to your rating

Your rating before this event, what each game was worth, and where you finished.

YOUR NCR THROUGH THE TOURNAMENT

Start · 2236 After 1 games · **2201**

Every point on this line is a real game. The line only moves when a result moves it.

How your Initial NCR was set

Starting point	Seeded from the official rating on the entry list — **2236**.
One event so far	These numbers come from this tournament alone. Claim your free NCR ID and **every tournament you have played** is found and counted towards one rating.
What moves it	Six things: your result, your opponent's strength, colour balance, the age of your opponents, seeding and upsets, and your mental game.

NCR CHANGE PER GAME

R1

Green bars added to your rating; red bars took points off. Beating someone stronger is worth more than beating someone weaker — that is the whole idea.

TWO

Game by game

What every result was worth, and how the running total built up.

THREE

Your dashboard, every month

One page that answers the only question that matters: am I actually getting better? This is what sits on it.

WHERE YOUR RATING IS GOING

Every event you play, in order, with the trend across all of them.

WINS, DRAWS & LOSSES

Split by Classical, Rapid and Blitz — a blitz result and a classical result say different things about a player.

What we do not claim

This report is built from the published results of this event. Where a player's rating was not printed on the entry list we say so and count that game at 1200, rather than inventing a number.
